Butch

Butch discovered his vocal talents early on in his life working for the telecommunication industry. Yelling into those paper cups attached to strings was the only way to communicate back in those days. He learned to play guitar and keyboards both at the same time, left hand guitar and right hand keyboards. Wow!

George

George is known as Mr. Clean, a true shredder from the 60's. His screaming guitar riffs rival that of Jimi Hendrix or even Jimmy Page. His Vocal talent is compared to Mick Jagger or Elvis. Now if he could only figure out how to plug in his air guitar...

Eddie

Dropped in the delivery room at birth, Ed was on his way to becoming the best rock drummer imaginable. As a small child he set up cans, bottles, pots, pans and just about anything he could get his hands on as a make shift drum set. Learning blues beats and rock n roll beats was a treat for Ed. I used to beat just about everything in site. When he got older he learned that he was one beat off.

Tom

Tom and his bass go together like Tom and his business, successfully. Whether he is putting those fidgety fingers to work on a piece of electrical equipment or a bass guitar, you're sure to have a out of this world amazing result. He's not from this planet but some far very distant unknown one. He was left behind from a future mission to Earth, which is suppose to happen in the year 2052.

The ultimate party band was originally formed in the rock and roll sixties. Playing many local clubs in the area they became a rather successful band in the garage band era. The band has changed through the years but the enthusiasm and spontaneity did not. The current "PACK" of 4 guys all from the Chicago area have an infectious good time when performing. This transcends into the audience enjoying the performance. "THE PACK" consisting of George on lead, Ed on drums, Tom on bass, and Butch on guitar and keyboards, all lend their vocal talents to the band. Their portfolio includes everything, from Alabama to ZZ Top. They play the best of the 60's through 80's.

THE PACK will give you the classic three chord favorites, to the intricate harmonies of the Beach Boys, to the Rock'n melodies of the Doobie Brothers. It doesn't take long to discover that this versatile band provides music for every taste, Motown to Disco. You will not be disappointed in a "PACK" performance. If you don't have a good time at a "PACK" function, you never will have a good time. Join them in their on stage antics, and participate in their ever popular "PACK" attack segments. A must see for anyone who wants to have a good time, and listen to great music.
